

Contact Python Lines

Characteristics:

- Economic
- Easy to install
- Professional Finish
- Energy saving
- Product Quality
- Recommended for remote cooler systems

Contact python Line is a **multiple tubes bundle covered with insulation foam to dispense beverages** like beer, soft-drinks, spirits,etc. **at low temperatures. A good python is designed to slow down the ingress of heat thus preventing from drinks to warm up when the taps are not being used.** The insulation foam reduces the heat gain and the water recirculation lines take heat of the python thus maintaining a low bundle temperature.
