Instant, Freshbrew & B2C

The Evolution range provides a truly versatile drinks vending solution for all environments where a high quality beverage needs to be served quickly and efficiently. The machines offer a full range of instant, **freshbrew** and **bean to cup (B2C)** drinks, an extensive selection of still and carbonated cold drinks and now you can "enjoy more" with the new **12oz model** which brings the coffee shop experience to your business or workplace.

Evolution machines are also environmentally friendly! The latest **power save** software reduces energy consumption whilst keeping the machine "vend ready". A bean to cup Evolution in energy save mode now uses 37.9% less energy per hour than when in idle mode while instant and freshbrew models use 27.7% less energy per hour!

Why Choose Evolution?

- Instant, freshbrew and bean to cup models available
- **Surevend™** guaranteed product delivery system fitted as standard
- **Power save** mode reduces energy consumption but keeps the machine "vend ready"
- Numeric or build-a-drink keypad increases versatility
- Flexible cup drop unit capable of vending paper and plastic cups
- Bespoke graphics available to special order
- Three point door locking for greater security
- Operator friendly! Easy to clean, fill and maintain
- Common components and simple machine programming
