

genesis

Instant, Double Freshbrew & B2C

With a large ingredient and cup capacity the Genesis has been designed to provide delicious, thirst quenching hot drinks around the clock. The machines offer a full range of instant, **freshbrew** and **bean to cup (B2C)** drinks and provide the perfect solution for offices, restaurants, cafeterias and conference facilities.

Genesis machines are also environmentally friendly! The latest **energy saving** software significantly reduces energy consumption whilst keeping the machine "vend ready". A bean to cup Genesis in energy save mode now uses 28% less energy per hour than when in idle mode while instant/freshbrew models use 35% less energy per hour!

Why Choose Genesis?

- Energy save mode reduces energy consumption whilst keeping the machine vend ready
- **Surevend™** guaranteed product delivery system
- Intuitive, user-friendly build-a-drink keypad
- Large 230 cup capacity from automatic cup dispenser capable of vending paper and plastic cups
- Bespoke graphics available to special order
- Fully compatible with established MDB and Executive coin and cashless systems
- Operator friendly! Easy to clean, fill and maintain
- Common components and simple machine programming
